

POWERBALL

TRADE CATALOGUE

DISTRIBUTION

Powerball's attention to detail and quality extends to our logistics infrastructure. Our purpose-built warehouse in Aldershot is temperature-controlled to provide industry leading storage with a capacity of over 100 million paintballs. Our fleet of vehicles, services regional sites with regular deliveries by our friendly team of drivers, who will provide you with an estimated delivery time and help you unload your delivery when they arrive.

Our location allows us to work with some of the best freight companies in Europe, allowing us to serve customers from Scandinavia right down to the tip of Italy. New logistics links now enable us to service the Austrian and Eastern European markets.

HEATED WAREHOUSE

Temperature and humidity is carefully monitored

Our state of the art warehouse is **temperature controlled** to ensure the quality of our paintballs. A massive area with capacity for over **100 million paintballs**.

BACK UP GENERATOR

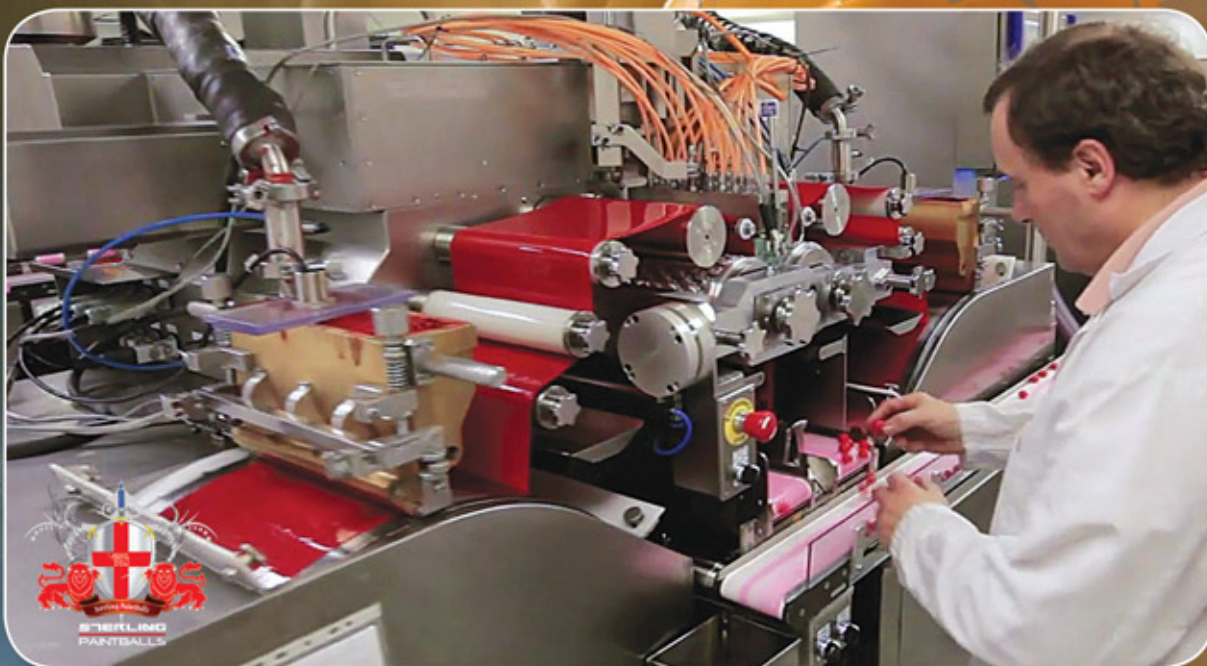

Our backup generator will ensure that we keep the product in perfect temperature controlled conditions in the event of a power failure.

FRENCH WAREHOUSE

The Powerball European presence was reinforced with the completion of our French distribution hub in 2010. Another dedicated facility, Powerball France extends our reach to Spain and Portugal, whilst consolidating our footprint in France and Italy.

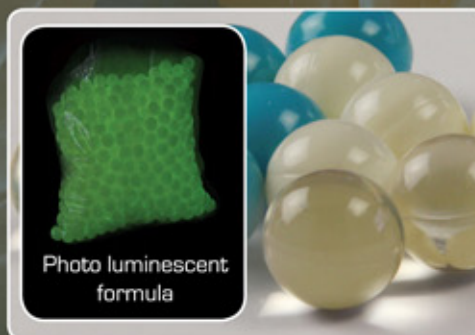

Our network of strategically-placed distribution hubs, dedicated vehicles and local knowledge with our distribution partners ensures you can receive Sterling Paintballs safely and promptly virtually anywhere in Europe.

Arrow Precision opened its state of the art paintball factory in late 2006 and is the only paintball manufacturer in the UK.

Our manufacturing plant runs 24 hours a day, producing quality paintballs shipped daily across Europe. Every batch goes through a rigorous series of tests to deliver the most consistent range of products in the market. We source the best materials and can trace the origins of our raw materials back to their factories to ensure you always get the best product with every delivery.

Arrow Precision produces the Sterling range of paintballs (Claymore, Excalibur, Mirage, Mace, Shield and Sabre). We are also able to produce bespoke paintballs as well as a personalised packaging service for larger order customers.

BESPOKE PAINTBALLS

Did you know Arrow Precision can make custom fills and shells?

We can produce custom formulations to order. These include specific colours, clear fills, opaque fills and even photo-luminescent paintballs.

The Arrow Precision paintball factory is temperature and humidity controlled to ensure perfect environmental conditions for manufacturing paintballs.

COMPETITORS
PAINTBALLS USE
HIGH STARCH
FILLS AND
STAINING DYES

STERLING PAINTBALLS
OIL FREE FORMULA

1. Less staining at your site

Sterling Paintballs leave **no staining, and minimal residue**, so your kit will look like new every time it is issued. Our range of paintballs utilise a **PEG based fill** which is soluble in rainwater, as opposed to a nasty mixture of oil, starch and other fillers which hang around forever. You may already have noticed this residue with some imported brands of paintballs.

2. Consistent quality

Each batch of paintballs is **tested and inspected** for **shape, size, roundness and brittleness** prior to **shipment**, to ensure the best quality possible.

3. Years of experience in the Industry manufacturing paintballs.

The Arrow Precision factory has been producing Sterling paintballs since 2006 and has a **wealth of experience** in producing **high quality environmentally friendly** paintballs.

4. Customer satisfaction

Keep your players coming back by using a **quality ball that breaks on target and not in their gun**. Less time cleaning breaks on field means more time playing, and spending.

Supplying your customers with cheap, low-quality paintballs simply pushes them into the arms of your competitors, when they have a bad day. Give them the day they came for and maximise your profits.

THE ONLY PAINTBALL
MANUFACTURER
IN THE UK

5. Made in the UK

There are no other paintball manufacturers in the UK. With **Powerball** your business will **not have to suffer the long transatlantic and Asian shipping times** associated with **overseas factories**. With Sterling Paintballs you will receive the **freshest, most consistent** product available in Europe.

Winter Formula:

A tough shell formulated to withstand colder temperatures out in the field, minimizing problems such as deformation and brittleness usually associated with winter months.

AT NO EXTRA COST
Other suppliers often charge more for their winter-formulas.

Paintballs suitable for all SEASONS

Resistant to varying temperatures

**ATTRACT
NEW CUSTOMERS!**

.50 calibre paintballs deliver a considerably lower impact than .68 calibre, introducing your business to a younger audience. This includes school groups, parents of young children and anyone else concerned about the perceived impact of playing paintball.

- ✓ LOW IMPACT - LESS BRUISING OF YOUNGER CUSTOMERS
- ✓ GAS EFFICIENT - MORE SHOTS PER FILL
- ✓ LOWER COST - INCREASES SITE PROFITABILITY
- ✓ STORAGE - SMALLER STORAGE AND TRANSPORT COSTS

Sterling Excalibur

The ultimate pro-level tournament ball. Excalibur is the finest tournament ball from our production facility. Designed by and for demanding tournament players, Excalibur is engineered with a brittle shell and thick fill to ensure your hits make their mark and stay there during the game. Exceptional quality control ensures you get the best out of each box every time.

- Vivid, yellow metallic shell.
- Consistent roundness for unmatched accuracy
- Tournament-compliant yellow fill.

Sterling Mace

Sterling Mace is our popular tournament ball engineered to withstand the extremes of the tournament season. Expect consistent performance from spring, summer and autumn. The bright yellow PEG fill washes out easily prolonging playing gear and tournament fields making Sterling Mace the ball of choice for teams looking to play all season.

- Anti-wipe, thick, bright fill
- **NEW:** Tournament-compliant yellow fill
- Summer and autumn formula: Compete over the whole tournament season.
- Ideal for low-pressure, high performance markers.

Sterling Mirage

Sterling Mirage is the ultimate paintball for woodland play. The custom olive and brown shell means your opponents won't know where it came from, but the bright neon fill will let the marshal know where it landed. The harmless PEG fill washes off in water protecting your woods for another battle.

- Sterling's stealthy offering! Created for woodland scenario play.
- Camo coloured, virgin gelatine shell: Virtually invisible in flight
- Bright neon-coloured, PEG-based fill: Highly visible in dark woodland
- Perfect roundness for ball on ball accuracy.
- Available in four seasonal formulations.

Sterling Claymore

Claymore is the premium ball for walk-on and big game events. The virgin gelatine shell is produced to deliver a tournament-grade consistency, but with a more robust shell. This allows Claymore to work across the whole range of paintball markers. A versatile formula, Claymore is available in clear versions or photo-luminescent versions for the ultimate night-game experience!

- Sterling's high- end field ball: The top choice for walk-ons.
- Virgin gelatine 2-tone shell: Bright, visible colours.
- Clear-fill, clear-shell and photo-luminescent versions available to order.

Sterling Shield

Sterling's mid-level field ball. Our best-selling line. The most reliable field-ball available. Sterling Shield has the resilience to withstand the rigours of rental play, but is still accurate enough to keep customers happy. Made to standards unmatched in this range, Sterling Shield is the premier ball that protects equipment, profits and repeat business.

- Available in four seasonal formulas: Sustained performance throughout the season with no extra costs involved.
- PEG-fill for easy cleaning: Keep your site looking presentable and professional
- Excellent eco-credentials: No environmental impact on your buildings or woodland.

Sterling Shield .50 cal/Sabre

New from Powerball is our .50 calibre field ball. The same renowned quality and consistency from Sterling Shield .68 cal is now available to a wider audience. .50 calibre paintball allows you to attract younger customers into your business. Birthday parties and school groups previously anxious of paintball can now be introduced to your site. Additionally, savings can be made on shipping and gas consumption, further improving your margins.

- PEG-fill- same non-toxic, easy to clean fill as Sterling Shield
- Summer and winter formula
- Compatible with gas and spring-powered .50 calibre paintball markers.

Sterling Gauntlet

Sterling's entry level field ball. Ideal for the budget-conscious site operator. **SUMMER BALL ONLY**

- Consistent shape and reliability
- Resilient shell suitable for summer conditions only.
- Orange shell / orange fill

PRODUCT RANGE

MANUFACTURING PAINTBALL EQUIPMENT

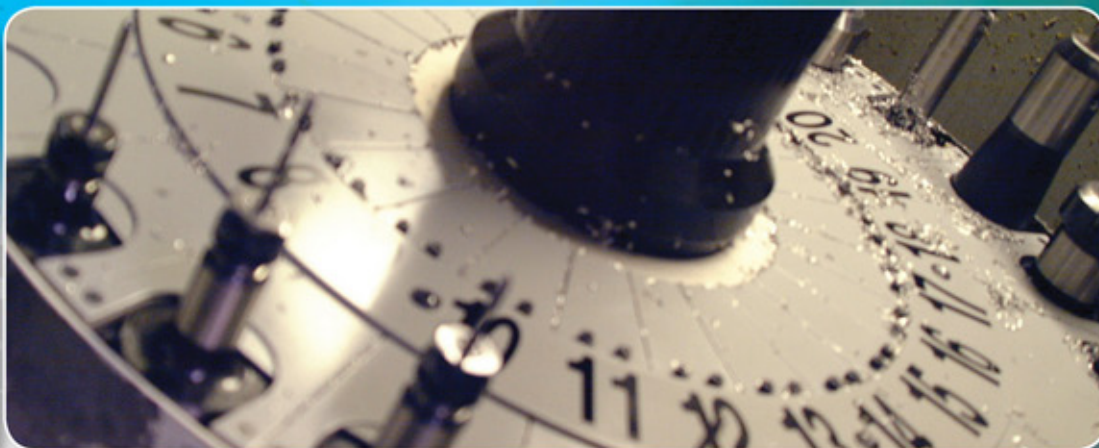

Arrow Precision

Arrow Precision Limited has been manufacturing high quality paintballing equipment in the United Kingdom since 1996. Located in Aldershot next to its sister company Powerball, near major transport links like the M3 and M25, it has excellent links to virtually any location in the UK and Europe.

From CO₂ valves and accessories through to paintball guns and paintballs, we have established ourselves as the largest paintball equipment manufacturer in Europe. With customers worldwide, we have a reputation for producing products of the highest quality and durability.

In 2005 Arrow Precision opened its subsidiary Arrow Precision LLC in Pennsylvania and can offer US customers the same fine level of service as its European customers. We distribute the Sterling, Inferno and Sovereign paintball guns to the US and Canada through select partners.

Research and development is the lifeblood of Arrow Precision. No other trade partner in the industry has the equipment, experience and innovation to deliver dedicated reliable equipment to site owners. By listening to our customers, we are able to work with them and apply their experience to our products.

Thanks to cutting edge CNC machinery and top-end software such as Pro E and Edge Cam, Arrow Precision is able to prototype and test all its creations before approving them for field use.

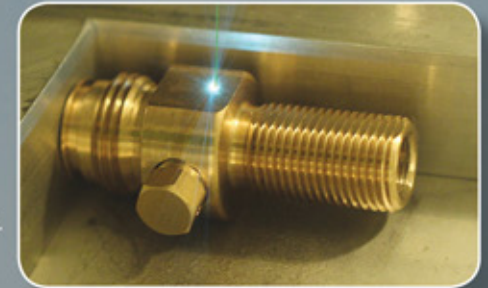

From a burst-disc cap right up to a complete Inferno, you will find Arrow Precision's quality and attention to detail in all our products.

Our sophisticated software is able to drive our laser engraver as well as our CNC machine. This allows complex logos to be etched onto your new Inferno fleet. With the ability to anodise our markers to order, you can own a fleet of markers that are unique to your business.

Having your company logo on your Inferno marker percolates your business through social media. Happy customers distribute the photos of their day at your site on their Facebook pages or Twitter feeds.

A memorable logo and unique colour scheme immortalises your site through the internet at no additional effort on your behalf. Separate your business from every other site by having a distinctive look to your markers that everyone will recognise.

Additionally, a company name and contact details will deter potential thieves and will go some way to preventing your Inferno turning up at a competitors site.

LASER ENGRAVING

Important Information

- Custom colours and engraving are only available on the purchase of new guns
- An additional charge for custom anodising and laser engraving will be applied.
- If you prefer standard black or silver anodising, we may be able to provide engraving free of charge, depending on the complexity of your logo.
- Engraving on silver anodised guns is not as noticeable since the base metal (aluminium) is the same colour as the anodising. This will give a very subtle effect. The engraving itself cannot be coloured.
- Payment for customised products is required prior to production, although a sample may be provided for approval beforehand. Lead times apply, which vary throughout the year.

NEW

Convert your
Inferno from
.68 to .50 Cal

Inferno .50 Cal Insert Kit

Keep your existing marker with the Inferno .50 cal conversion kit. Your Infernos can be converted to the .50 calibre format and back again, in a matter of seconds.

A new compact barrel, breech adapter and a light weight Delrin bolt, completes the kit. You can use your existing .68 calibre hopper or opt for a smaller .50 cal hopper with our optional adapter. For younger players, a 0.2L cylinder will reduce the profile and weight of the marker making it easier to handle. For adults, using the standard 0.8L cylinder can reduce your gas consumption by up to 30%.

Site Set Up

Powerball does more than just supply site equipment. Our support goes beyond hardware and we can offer assistance to new owners looking to set up their own site. Our experienced staff can cover all aspects of site management from marketing through to construction. We can advise you on equipment maintenance, booking systems and even game concepts as part of our portfolio. Additionally, a dedicated in-house design office is available to help promote your business through print and web.

Staff Training

Your site staff are the face of your company and your customers main point of contact on the day. Powerball can arrange a visit from one of our site managers to provide staff training in an informal and productive session. We will cover Inferno maintenance & troubleshooting, CO2 or compressed air training where applicable and general customer service training. Let us help you deliver an experience to your customers that will have them returning to your business time and time again. Call to arrange an appointment (subject to location and availability) or visit our offices.

Site Starter Pack

These products and those shown on the price list give an idea of what you may wish to include in your site start up package. We can fully customise these packs to suit your individual needs. You may wish to add or remove items, or exchange some for alternatives in our range. Just give us a call to discuss your requirements.

Online support

Log on to www.powerball.co.uk and you will find a variety of information at your finger tips. Also why not try www.arrow-precision.com another useful source of information for all your paintball equipment needs.

Products:

A guide to our complete range of products from paintballs to pot pouches, its all here.

Manuals and data sheets:

A comprehensive guide to our products, here you will find data sheets on Sterling paintballs including important safety information. On this page you will find diagrams showing parts and part numbers needed when ordering spares, together with maintenance guides and information about converting your marker from CO2 to air complete with a list of the components needed and how to fit them.

Videos:

The home to our new maintenance videos, showing you how to clean your Inferno, replace important parts and covering the symptoms of a mis-firing marker.

SITE SETUP

INFERNO

1 | INCREASED SALES

Quality that speaks for itself

Field strip in seconds

Simply removing the cocking pin and bolt, **allows quick cleaning of the barrel, bolt and body in seconds**, which keeps your customer shooting paintballs and **increases your sales**.

Cost of maintenance

Gas and spare parts are obvious items that contribute to the total cost of owning a marker. However, an item that most people forget about is the cost of the labour to fit spare parts and generally maintain a marker, which can become considerable as the work must be done by a trained or experienced person.

In the case of the **Inferno** the **parts last longer than any other site marker in the business, keeping your costs to a minimum**. A marker that requires frequent parts changes will incur labour costs that will become quite significant, even if the parts were supplied free of charge.

Markers that require frequent parts changes will fail more often, which is not what you need when you are trying to run a paintball game where a faulty marker can cost a field operator significant income while the customer is not shooting paintballs.

2 | RUNNING COSTS

Cost of ownership

Attention to detail is what makes the **Inferno** the highest quality field marker that money can buy. Introduced in 1997, in service around the world, in all weather conditions, the **Inferno** is the most reliable, lowest maintenance paintball gun available.

Low gas consumption

Infernos use a third less gas than some competitors so you won't face large gas bills.

“Using the Inferno for 10 years, it's the only choice.”

Lawrence Barwick -
Director, Skirmish Lasham

“Inferno - the Aston Martin of site paintball guns”

Niall Squire -
Campaign Paintball

“The Inferno paintball marker. It is very reliable, easy to clean, air efficient and maintenance is virtually nonexistent.”

Ronnie Hollington - Mayhem Paintball

3 | RELIABILITY

Ten years on site and still going !

Infernos just keep going and going. Built with high quality materials and anodised for longer life, giving longer lasting parts and unsurpassed reliability. The life span of the Inferno is the longest in the business, meaning that if it is properly maintained, it will last 2 to 5 times longer than our competitors, resulting in the best return on investment in the industry.

Technical support

Speak to the people who design and build the product. We have answers for any questions you may have.

Spare parts

We support what we sell. Europe's largest range of spare parts for Inferno's are available for same day dispatch. Factory servicing is also available.

Made in the UK

Europe's largest and most up to date paintball machine shop, assuring that manufacturing quality is second to none.

MADE IN THE UK

Inferno Field Mk3

Based on the original Inferno Field, the Mk3 has been upgraded to give even greater comfort, visual impact and utility, making it the ultimate field marker. Adding a 45 grip and double trigger to the Mk3 has transformed the trigger pull and feel to one of the most comfortable ever. Shortening the body, sculpting the top of it as well as the feed neck has produced the sleekest looking and easiest to clean field Inferno yet.

The redesigned body and cocking pin allows for field stripping without removing the cocking pin from the bolt - an enormous help allowing the cleaning of the barrel, breech and body in one swift action. A new lighter Delrin bolt helps reduce the weight of the internals, further increasing gas efficiency and making this one of the lowest cost field markers to run.

INFERNO

Quality that speaks for itself

The rear of the body is slotted allowing the bolt to be removed without totally removing the cocking pin. Making cleaning the marker easier and bolt misalignment impossible.

New lighter Delrin bolt helps improve gas efficiency.

Restyled, lower profile, body reduces dirt traps.

Double trigger shoe for comfort and lighter trigger pull

Inferno Field Mk2

Based on the original Inferno Field, the Mk2 has been adapted and upgraded to give even greater usability and visual impact, making it the most popular version of the Inferno ever amongst field operators.

The barrel has been sculpted, we've added a comfortable fore grip, increased the clearance above the hand at the back of the grip and added an integrated feed neck.

Available in Black, Silver, Red and Blue.

INFERN
Quality that speaks for itself

INFERNO FIELD MK2

INFERNO FIELD

Inferno Field

Designed and built by Arrow Precision, the Inferno has been made to last. The Inferno Field is the most popular field gun in Europe. Built with quality and performance in mind, it is made from carefully selected, corrosion resistant materials and is anodised for durability. It comes bottom-lined as standard, a 10 inch barrel, with other barrels available from all leading manufacturers.

The Inferno is incredibly easy to clean and maintain. No tools are required to field strip and clean it through in less than 30 seconds. This is one tough gun, specifically designed and built for the field operator.

Introduced in 1997, with tens of thousands of units in service around the world, in all weather conditions, the Inferno is the most reliable, lowest maintenance site paintball gun available. When your income depends on reliability and cost of ownership, the Inferno is the only choice.

Available in Black, Silver, Red and Blue.

SCOREBOX

TAKE CONTROL of your stock and eliminate human error with our Powerball Scorebox. **A robust system designed to quickly dispense paintballs** to your customers, it does away with the inaccuracy of filling pots by hand. Configurable to dispense up to 100 balls at a time, the Scorebox is a **considerably faster system, saving much needed labour** and providing an accurate number of paintballs every time. A simple turn of the handle loads the balls into the awaiting pot or hopper in a matter of seconds. Releasing the handle reloads the Scorebox for another fill in the same time it takes to close a pot lid.

Solidly built from Aluminium with solid PVC walls, the **Powerball Scorebox is weather resistant** and more than capable of withstanding use in a harsh outdoor environment. It is designed to deliver **years of reliable, accurate service**. The Powerball Scorebox will save you time and money.

SACDE0001 - Score Box Sorter

- ✓ **Robust Construction.** Each Scorebox is built by-hand in the UK using quality components
- ✓ **Pre-assembled:** Ready to start saving money out-of-the-box
Low-maintenance: Easily accessible loading tray for cleaning
- ✓ **High capacity:** Holds up to 2,000 paintballs
- ✓ **Flexible:** Dispense 50, 60, 70, 80, 90 or 100 balls per turn
- ✓ **Accurate:** The transparent front of the Scorebox displays the number of paintballs dispensed. Never over fill your customers.

Quick and easy to use!

After assembly:

Choose how much paint you want to dispense by removing the desired number of bars.

STEP 1

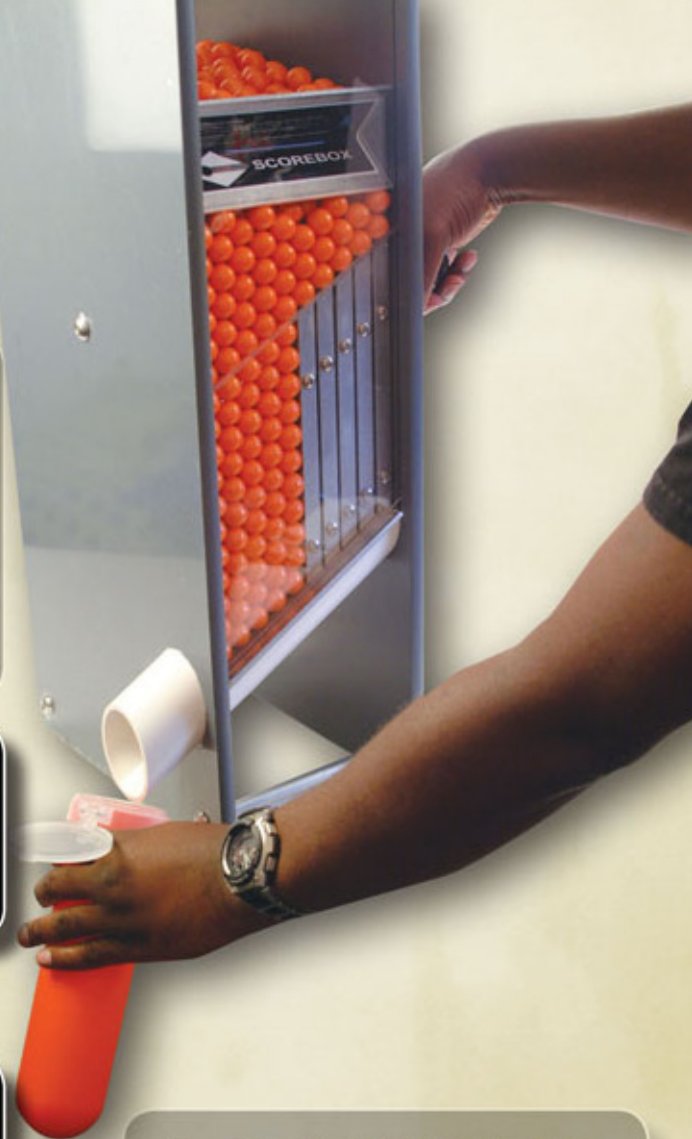

Empty the contents of your paint box into the top of the Scorebox.

STEP 2

Twist handle to dispense paintballs.

STEP 3

Release handle to reload the Scorebox.

The Airborn Air system is a **CE approved** high, flow, precision preset regulator for 3k or 4.5k use. Designed and manufactured in the UK, our regulator includes safety features such as:

- **Dual burst disc protection against over pressurisation**
- **Pressure relief flats** to allow a pressurised cylinder to vent, if an attempt is made to remove the regulator.
- **The only regulator to have a replaceable filter** that helps prevent flash filling and stops pressure regulation problems by keeping the internal parts free from dirt
- The Airborn Air System regulator **is the only field air system that is fully serviceable**. Airborn maintenance kits are available to keep your regulator running for many years. Save money and escape the throwaway disposable culture of other air systems.
- Each Airborn Air System regulator is **assembled and tested by hand** before despatch.

Airborn 3000 PSI Dual burst disk reg .08 L bottle = CPAIR0100
Airborn 4500 PSI Dual burst disk reg .08 L bottle = CPAIR0105

**NO OIL TO
BE USED**

**FULLY
SERVICEABLE
PARTS CAN BE
REPLACED EASILY**

Filtered fill nipple:

Protecting your regulator from dirt entering the main body results in your regulator working for longer than our competitors systems. HP Burst Disk - CPAIR0035

**MADE IN
THE UK**

British made parts available by next day courier.

Includes fill nipple cap to prevent dirt and dust entering the regulator.

CPAIR0030

**UNIQUE FEATURE:
FILTERED FILL NIPPLE**

Large, rugged gauge accurately displays output pressure.

Single burst disc available for either 300 or 200 BAR cylinders.

CYLINDERS AND FILL RIGS

A-Clamp Fill Rig - 232 BAR

Nickel plated for durability with stainless steel quick release and mini pressure indicator.

FILLR0040

Din Fill Rig - 300 BAR

Nickel plated for durability. Features push dump valve, made from stainless steel with a pressure gauge.

FILLR0035

Anti-siphon tube

Prevents liquid CO₂ getting into the marker, which reduces damage to the marker internals, paint chopping and increases gas efficiency.

CO2FT0035

ARE YOU USING CE APPROVED VALVES, REGULATORS AND CYLINDERS?

All Arrow Precision CO₂ valves and compressed air regulators conform to the new regulations and are T₁ marked, as are all cylinders supplied by Powerball.

Replacement Burst Disk

Replacement burst discs and seal gaskets are available.

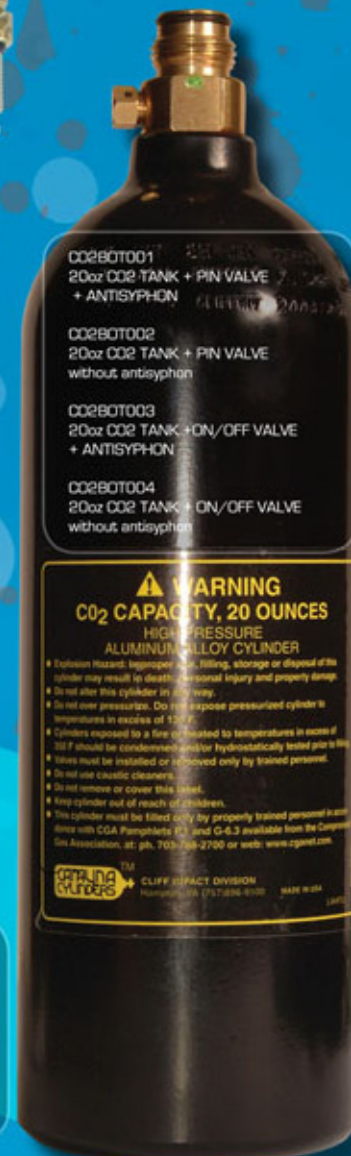

ENSURE YOU USE ONLY ARROW PRECISION PARTS FOR COMPATIBILITY

FILLR0075 Airborn Burst Disc Cap (Blue)
FILLR0095 Airborn Burst Disc Cap (Green)
FILLR0090 Airborn Burst Disc Cap (Red)

0.50 Cal Tank 0.21L

WARNING
CO₂ CAPACITY, 20 OUNCES
HIGH PRESSURE
ALUMINIUM ALLOY CYLINDER
● Explosion Hazard: Improper use, filling, storage or disposal of this cylinder may result in death, personal injury and property damage.
● Do not alter this cylinder in any way.
● Do not over pressurize. Do not expose pressurized cylinder to temperatures in excess of 120°F.
● Cylinders exposed to a fire or heated to temperatures in excess of 120°F should be condemned and/or hydrostatically tested prior to use.
● Valves must be installed or serviced only by trained personnel.
● Do not use caustic cleaners.
● Do not remove or cover this label.
● Keep cylinder out of reach of children.
● This cylinder must be filled only by properly trained personnel trained in accordance with CGA Pamphlets P-1 and G-4.3 available from the Compressed Gas Association, at: ph: 703-760-2700 or web: www.cganet.com

CLEAR LENS

LENSE0125

THERMAL LENS

LENSE0133

Each lens is coated with a special scratch resistant coating which protects both sides of the lens against scratches and minor abrasions. While the inside lens is coated with a special anti-fog formula that eliminates the need for a thermal lens.

Proto Field Full Cover

The Proto full cover goggle system offers the maximum protection and safety for your customers, helping maximise their paintball experience. Proto Rental Goggles Black GOGGL0095

Inner Frame with
Foam - Black
GOGGL0135

Adjustable comfort
chin strap secures the
goggle during active play.

SETBACK GOGGLES

Deluxe woven goggle strap for comfort and durability.

Venting drastically reduces re-ventilated fogging

- Integrated low profile visor, protects lenses from scratching when placed face down.
- Solid, lightweight construction protects the face and head from paintball impacts.
- Full head shield prevents painful head-shots.
- Simple 1/4 turn lens locking system makes lens changes quick and easy.
- Closed cell foam for a more durable and longer lasting rental goggle.
- Available in black only.

Proto Field

Proto Field comes with a single clear lens and built in fixed peak/visor.

Proto Rental Full Cover
GOGGL0136

Valve and Tank Safety

DO NOT tamper with, attempt to fit or replace valves unless you are qualified to do so.

Valves **MUST** be fitted to cylinders using a torque wrench set to 34-35 ft lbs. / 46-47 N.m. Thread-lock must be used when fitting valves to cylinders.

Use only TPED certified cylinders, regulators and valves bearing the 'PI' mark or any liability insurance that you may have is likely to be invalidated. Tanks **MUST** be re tested at the period specified by the manufacturer by a certified testing facility or your insurance may be invalidated.

Please observe all safety precautions given to you by your CO₂ / Compressed Air equipment supplier.

DO NOT overfill tanks/cylinders.

CO₂ is filled by weight, and compressed air is filled by pressure. In both cases, the rated fill of the cylinder will be stamped on the bottle wall. Do not exceed the rated fill. In the event of a Burst Disk rupture, a replacement disk of the correct specification must only be fitted by qualified persons and the burst disk cap tightened with a torque wrench set to 75 in/lbs / 8.5 N.m. Only use genuine Arrow Precision burst discs in our valves and regulators, as other manufacturer's burst discs may not be compatible with Arrow Precision valves and may invalidate the pi certification.

Gun Safety

DO NOT increase the velocity of your markers over 300fps. Leave enough margin when setting gun velocity to allow for fluctuations in velocity due to, among other reasons, ball size and temperature fluctuations - suggested range: 260-280fps depending on field size and/or age of participants.

Goggle Safety

Use only CE approved goggle systems which are specifically manufactured for paintball use. Follow lens manufacturers guidelines for lens care. Failure to use appropriate protective gear for the eyes, face and head can result in death or serious permanent injury (including injuries to the throat and/or loss of eyesight and/or hearing).

PAINT STORAGE GUIDE.

DO NOT
SHOOT AT
THE HEAD
OF ANOTHER
PERSON

DO NOT
SHOOT AT
ANIMALS

DO NOT
ALLOW
PAINTBALLS
TO FREEZE
STORE AT
15-30°C

FRAGILE!

HELPFUL INFORMATION

Important

Use of paintballs can be dangerous if safety storage guidelines are not adhered to. Keep paintballs away from children. Paintballs must only be used in conjunction with CE approved safety gear. Failure to use appropriate protective gear for the eyes, face and head can result in serious injury or death, damage to your eyes, throat, ears and/or eye sight. Paintball is physically demanding and players may be aware of current heart conditions when participating. Do not shoot at the head of another person. Do not shoot at animals. Do not eat paintballs.

Storage

To maintain optimum performance, paintballs must be stored at 15-30 degrees Centigrade (59 - 86 degrees Fahrenheit), with relative humidity level no higher than 50%. Do not allow paintballs to freeze. Improper storage of paintballs may compromise performance and increase likelihood of injury.

Medical Information

These paintballs are made from non-toxic, natural ingredients and are fully biodegradable, non-irritating and non-harmful to the skin. Use soap and water to wash paint from skin. Avoid contact with skin. Avoid contact with eyes. Do not rub eyes if contact occurs. Rinse well with water or saline solution and seek medical attention.

The following is a quick guide to the basic maintenance of your marker.

Basic Maintenance should be carried out after each game, failure to do so will void your Manufactures Warranty. A full strip of the gun should be done when your marker is subjected to adverse conditions.

WARNING - Do not attempt to dismantled the Inferno beyond removing the barrel and bolt without first making sure that it is unloaded and de-gassed.

Step 1

Remove the cocking handle (part No. 0034) from the main body (Part No. 1310).

Step 2

Remove the main bolt from the Inferno, (Part No. 0045) it should slide out easily.

Step 3

Squeegee the Inferno with a Powerball Bow Tie Squeegee making sure it removes all dirt and paint.

Step 4

Using Inferno Lube, squirt a few drops on the long Bolt.

Step 5

Place the long bolt back into the Inferno marker. Make sure the largest hole on the bolt is facing down.

Step 6

Push the cocking handle back into the long bolt. The knurled part should be facing up. It should click into place.
